Sent on behalf of: CSUSM CHRS Team

Hello Campus Partners,

Thank you for your patience as we continue working through the CHRS implementation. At this time, downstream business processes that rely on RADAR remain unavailable. This includes key functions such as ePANs, reporting, ESPs, and application-related processes supporting access requests and hiring activities.

We will share an update as soon as these functions become available again. We appreciate your understanding in the meantime!

CSUSM CHRS Team
