FREQUENCY REPORT
Number of Surveys (n) = 1128 Web Surveys

A note about this report:
Survey responses are reported by gender based on the responses to questions 47a, 47b, and 47c. For the purpose of the ACHA-NCHA report documents, respondents are reported as female or male only when their responses to these three questions are consistent with one another. If students' gender identity matches their sex at birth AND the student selects "no" for transgender, then respondents are designated as either male or female. If respondents select "yes" for transgender OR their sex at birth does not match their gender identity, then they are designated as non-binary. A respondent that skips any of the three questions is recorded as unknown or missing.
