PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes the following:
1. Stainless steel glass railings fabricated from custom shapes.

1.3 PERFORMANCE REQUIREMENTS FOR HANDRAILS AND RAILINGS

A. Structural Performance of Handrails and Railing Systems: Engineer, fabricate, and install handrails and railing systems to withstand structural loads without exceeding the allowable design working stress of the materials for handrails, railing systems, anchors, and connections.

B. Thermal Movements: Provide handrails and railings that allow for thermal movement.

C. Control of Corrosion: Prevent galvanic action and other forms of corrosion by insulating metals and other materials from direct contact with incompatible materials.

D. Design Requirements: Design of handrail shall prevent climbing or using railing rungs as a ladder.

PART 2 - PRODUCTS

2.1 MATERIALS

A. As required by Design/Builder, Structural Engineer and Code.

PART 3 - EXECUTION

3.1 GENERAL

A. As required by Design/Builder, Structural Engineer and Code.
